

HANLEY

BRICK and

TILE

THE PROVEN BUILDING MATERIAL

Ageless in beauty and strength . . . contemporary in effect . . . brick and tile have demonstrated their efficiency through the centuries. Now, Hanley Brick and Tile have added the color demanded by modern living to their time-tested durability. These glazed ceramic products, with their combination of versatility and dependability, are fitting companions of Hanley's traditional face brick and red floor tile.

HANLEY STANDARD

HANLEY CERAMIC GLAZE TILE

Good looks and easy, low-cost maintenance are two features of Hanley Structural Glazed Facing Tile which appeal to the far-seeing executive and architect. Hanley Facing Tile is available in a wide range of color to fulfill the interior designer's wish and is completely resistant to stain, crazing and spalling. Because of Hanley's uniform size control, Hanley Structural Glazed Facing Tile aids in fast, true alignment of courses, and its impenetrable glaze make Hanley Tile especially helpful where sanitation is a necessity.

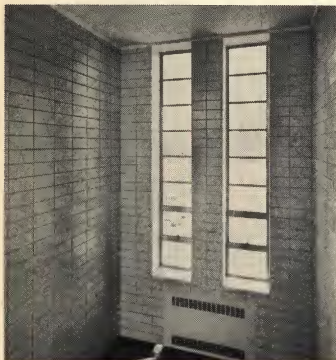

Hanley's No. 711, pure cream, offers an added economy to the builder, since a very large volume of production makes it available at an unusually low price.

Combination of color appeal
Field—6T series—#745 Cream, Brown, Mottle
Base—6T series—#701 Black

COLORS AVAILABLE IN "4D" AND "6T" MODULAR SERIES

	No.	Color	Features
PLAIN COLORS	711	Cream	A soft glow for spacious areas
	714	Peach Coral	Warm, flattering feminine tone
	719	Light Green	Eye-soothing, always popular
	757	Yellow	Sunny color for dark areas
	764	Ivory Non-Glare	Pleasing, velvet finish
	775	Light Grey	Subtle background, good visibility
MOTTLED COLORS	745	Cream Buff	Adds texture interest to soft tint
	749	Green	Tranquil, dappled effect
	772	Grey	Quiet color for large areas
SPECKLED COLOR	763	Cream	Attractive surface, complexion-hue
TRIM COLORS	701	Black—gloss	Combine and contrast with all ceramic glaze brick
	708	Dark Green	
	718	Turquoise	
	780	Brown

"4D" MODULAR

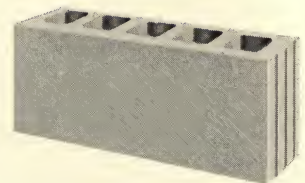

Face Size:
5 $\frac{1}{16}$ " x 7 $\frac{3}{4}$ "

All colors of Hanley glazed tile are available in the standard modular series, plus cove base, bullnose and coved internal corner units. Latter units aid cleaning.

"6T" MODULAR

Face Size:
5 $\frac{1}{16}$ " x 11 $\frac{3}{4}$ "

Permanent in color and finish, Hanley Ceramic Glazed Tile is moderate in initial cost, inexpensive in maintenance cost. Withstands all U. S. Bureau of Standards and A.S.T.M. tests.

CERAMIC TILE AND BRICK

HANLEY DURAMIC BRICK

Newest tool for the expression of the architect's dream is color . . . color permanently fused to brick. This is Hanley Duramic Brick, which combines the age-proven durability, easy maintenance and insulating qualities of brick with the mid-Twentieth-Century vision of color. Hanley ceramic engineers and special equipment have joined to produce a color-glaze that will not crack or spall and is highly resistant to crazing. In many of America's soaring buildings, Hanley Duramic Brick has already stood the test of many changing seasons without dimming its distinctive color or dynamic strength.

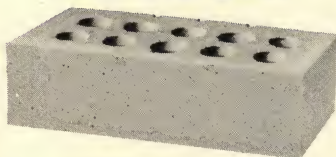

100 Park Avenue Building, New York City
Architects: Kahn and Jacobs
Duramic #725 Pearl White

COLORS AVAILABLE IN STANDARD BRICK SIZE

No.	Color	Features
711	Cream	Luminous tone, high reflection

719	Light Green	
721	Yellow	
770	Dark Grey	
780	Brown	
791	White—matt	

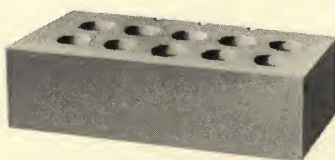

TRIM COLORS

LIGHT FACE BRICK

Hanley's long-time leadership in this field is the result of consistent research, the "single-setting" process and advanced equipment. Available in all textures, uniform or mingled shades.

BRADFORD REDS

The remarkable matching qualities of these famous Reds have made them the first choice of architects for over a half-century. Available in five textures and controlled or shaded light, medium and dark reds.

#770 Slate Grey

CERAMIC GLAZE BRICK AND TILE

CHARACTERISTICS

A vitreous, ceramic glazed finish is fused at high temperatures to a de-aired Clarion fireclay body in Hanley's patented gas-fired tunnel kilns.

ABSORPTION

The body absorption of Hanley glazed brick and tile approximates 5%, considered ideal according to the best standards of masonry. This absorption rate eliminates sliding of the brick during laying and provides an efficient suction bond.

FINISH

Hanley's technical research over many years has produced a close process control which insures a permanent glazed finish that will retain its "new look" years after installation.

All glazes are thoroughly tested for resistance to crazing, and Hanley ceramic installations have never had a failure.

All Hanley glazed products withstand the autoclave test as recommended by the A.S.T.M. and U.S. Bureau of Standards.

GRADING

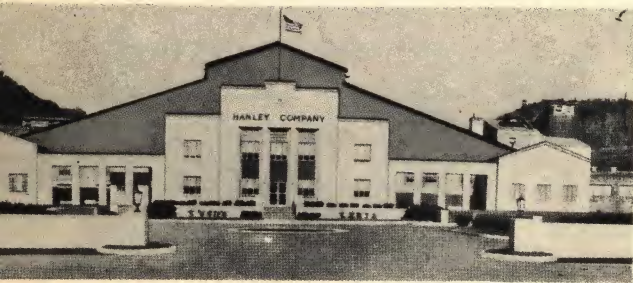

Standards of A.S.T.M. are closely followed.

PACKING

All Hanley Glazed Tile units are packed in paperboard shippers with separators, unless otherwise requested.

SHAPES

All standard shapes are available. Ask for our catalogue.

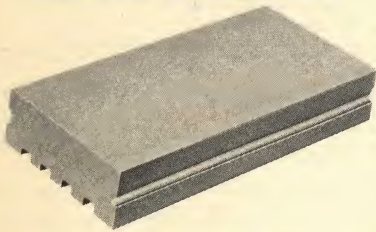

THE HANLEY COMPANY

For more than sixty years, The Hanley Company has constantly improved and expanded its facilities to serve the building profession. Its two huge plants at Summerville (pictured here), and Bradford, Pa., are equipped with the most modern machinery and materials handling mechanisms, many of them pioneered by Hanley, which, together with a rigid product control, assure the highest standards of quality in all Hanley brick and tile.

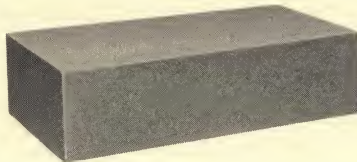

OTHER HANLEY BRICK AND TILE PRODUCTS

IMPERVO FLOOR BRICK

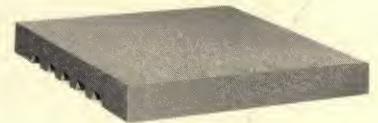

This extremely rugged floor brick guarantees an absorption of less than one percent and is highly resistant to surface shattering. Developed for severe requirements of industrial walls and floors.

ACID-RESISTANT BRICK

Specially-processed, this vitreous brick with an absorption rate of less than one percent has proven superior where high resistance to acids is essential. Uniformity of size and full line of special units produces economy of installation.

IMPERVO QUARRY TILE

Hanley's Quarry Tile is produced for areas subject to heavy wear. Economical to install because it is machine-sized on all four sides and eliminates the need of floor repair. Non-slip surface available.

Call or write your nearest Hanley office for technical catalogues and special information.
